

# IPA CLEAN SNAP SWAB

Microfiber Covered Foam Swabs **YOUSITE** COMPANY

## TECHNICAL DATA SHEET

### 99% Isopropyl Alcohol Impregnated Snap Printer Head Ipa Swabs

P/N:  
YST-IPAPET-4.5

### Technical Specification

- Head Size: 13\*8.0\*22mm
- Solution content: 99.9% IPA
- Length:109mm
- Head material: Microfiber Covered Foam
- Handle material:polypropylene
- Liquid content: about 1.4ml, alcohol concentration is 99.9%
- Other sizes can be customized.
- Safe for ESD static-sensitive surfaces

The IPA Clean Swab is a high-quality cleanroom swab designed for critical cleaning in small and hard-to-reach areas. This swab features a wide paddle head that combines an absorbent inner foam layer with an outer layer of micro-denier fabric, providing excellent cleaning performance. The handle is four inches long and contains a reservoir of 99.9% isopropyl alcohol (IPA), which can be released into the paddle head for enhanced cleaning power.

### Applications

**Medical Device Manufacturing and Assembly:** Suitable for cleaning medical devices without introducing contaminants.

**Electronics Manufacturing and Assembly:** Ideal for cleaning circuit boards, sensors, or stencils.

**IoT and Telecom Applications:** Used in maintaining clean surfaces in IoT and telecommunications devices.

### Directions for Use:

- Release Fluid: Bend the handle carefully to release the IPA into the tip of the swab.
- Safety: Use safety gloves during handling.
- Discard After Use: Dispose of the swab after a single use.
- For industrial use only.
