

IPA CLEAN SNAP SWAB

FOAM TIP

TECHNICAL DATA SHEET

99% Isopropyl Alcohol Impregnated Snap Printer Head Ipa Swabs

P/N:
YST-IPASS-4.5

Technical Specification

- Head Size: 13*8.0*22mm
- Solution content: 99.9% IPA
- Length:109mm
- Head material:foam
- Handle material:polypropylene
- Liquid content: about 1.4ml, alcohol concentration is 99.9%
- Other sizes can be customized.

Features & Benefits

- Cleaning electronics: IPA snap swabs are often used for cleaning electronic components, including circuit boards, connectors, and keyboards. They can help remove dust, dirt, and grime from hard-to-reach areas
- Industrial cleaning
- Medical and laboratory use: for cleaning and sterilizing equipment, including pipettes, lenses, and other delicate components.

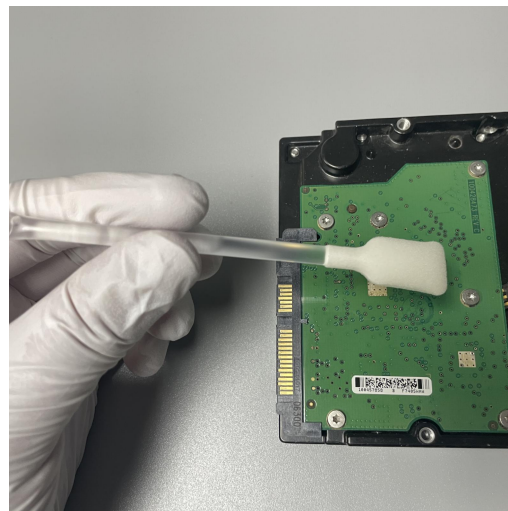

IPA swab foam tip electronic cleaning swabs are specialized cleaning tools designed for the precise cleaning of electronic components and other sensitive equipment. These swabs are particularly useful for cleaning hard-to-reach areas or delicate surfaces that may be difficult to clean with traditional cleaning tools or methods.

The plastic handle on the swab is filled with a 99.9% IPA solution. - Just squeeze or break the plastic handle and the foam head will fill with ipa.

The foam tip is made from a soft, non-abrasive material that is designed to gently clean and remove dirt, dust, and other contaminants from electronic components, including circuit boards, sensors, and other delicate parts.

Applications

99.9% IPA Swab is a specialized cleaning solution that contains 99.9% isopropyl alcohol (IPA) and is designed to clean and remove dirt, dust, and other contaminants from sensitive electronic components such as circuit boards, connectors, and keyboards.

For industrial use only.
