

# Cleanroom Silicone Swab Gel Sticky Pen (OEM, 0.5-3.0mm)

ESD Gel Sticky Swab

P/N:YST-008

## Technical Specification

- Model: YST-008
- Head material: Silicone Gel
- Handle Material:  
ABS,Stainless Steel
- HandleColor:primary color
- Standard Compliant: Class 10  
ISO Class 4 Certification

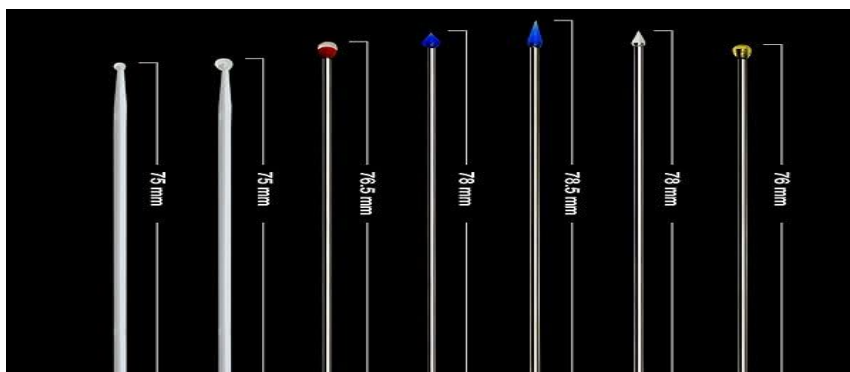

## TECHNICAL DATA SHEET

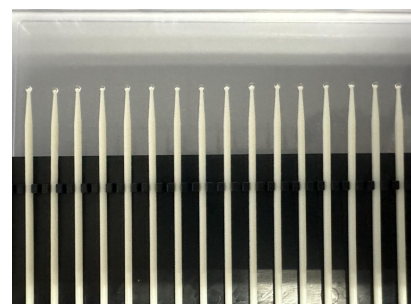

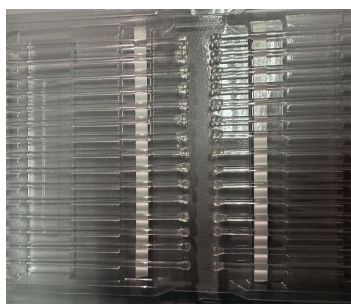

### Product Description

The Gel Sticky Pen is a professional cleaning tool designed for sensitive electronic equipment.

Featuring a transparent silicone head with high viscosity, it efficiently removes dust and fingerprints without scratches, thanks to its soft texture. The compact and flexible design allows for easy access to small and hard-to-reach areas. With excellent absorption capacity and ESD control, it operates effectively in various humidity levels and pairs well with solvents like isopropyl alcohol. Each box contains 100 swabs, reusable up to 50 times, making it an ideal choice for cleaning precise components like wafers, cameras, and lenses while minimizing particle generation.

### Product & Packaging Images

### Environmental

Complies with RoHS and REACH requirements
